Integral philosophy is a transdisciplinary approach to understanding the world that seeks to integrate the insights of different disciplines and perspectives. It is a relatively new field of study, but it has already had a significant impact on a wide range of fields, including psychology, education, business, and politics.

One of the leading institutions in the study of integral philosophy is the State University of New York (SUNY) at Buffalo. SUNY Buffalo is home to the Integral Theory Consortium, which is a group of scholars who are dedicated to the development and dissemination of integral theory. The consortium offers a variety of programs, including a PhD program in integral theory and a master's program in integral studies.

The faculty of the Integral Theory Consortium includes some of the world's leading experts in the field, including Ken Wilber, Allan Combs, and Mary

Evelyn Tucker. These scholars have made significant contributions to the development of integral theory, and they continue to be active in the field today.

The Integral Theory Consortium is a major center for the study of integral philosophy. The consortium offers a variety of programs and resources for students and scholars who are interested in learning more about this exciting new field.

Integral Theory

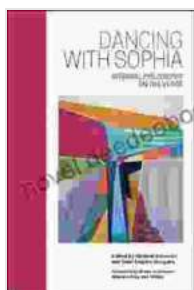

Integral theory is a metatheory that seeks to integrate the insights of different disciplines and perspectives. It is based on the idea that the world is a complex system that can be understood from a variety of different perspectives. Integral theory provides a framework for understanding the world in a holistic and comprehensive way.

Integral theory is divided into four quadrants: the interior, the exterior, the individual, and the collective. The interior quadrant includes the subjective experiences of individuals. The exterior quadrant includes the objective world of matter and energy. The individual quadrant includes the development of individuals from birth to death. The collective quadrant includes the development of societies and cultures.
